

Operating Instructions of Tatung Photocatalyst

1. Product code : TIO-0922
2. Composition : TiO₂ nanoparticle, Medical grade alcohol, Inorganic resin, Deionized water
3. Application : The photocatalyst can be used in surface of any substrate that can be in touch with light, for example, the surfaces inside and outside of buildings, cars, electric equipments, furniture and etc.
4. Operating condition :
 - ① Spray : Spray the photocatalyst on surface of any substrate that can be in touch with light, until surface is wet.
 - ② Dip : Dip the substrate into the container filled with the photocatalyst 5-10 seconds ◦
5. Baking condition : 15mins at 120°C ◦
